Why Filtration?

- ✔ With Fullcheck Services Filtration Service, we remove impurities from lubricants and minimize mechanical breakdowns. Thus, we extend life time of equipment and lubricants, providing significant cost savings for your business.
- ✔ We boost your maintenance activities and increase your efficiency by preventing possible troubles caused by high particle contamination.
- ✔ We analyze the samples obtained from your business in our TURKAK (Turkish Accreditation Agency) approved laboratories and share the reports with you through our digital service software, Fullcheck. As part of our continuous improvement and operational excellence approach, we provide reliable service through the works carried out on-site by our expert field team.

Scope of Service:

- ✔ Filtration of hydraulic fluids
- ✔ Filtration of gear oils
- ✔ Filtration of turbine oils
- ✔ Filtration of compressor oils
- ✔ Filtration of machining fluids

Advantages Provided:

Reducing oil and waste management costs

Increasing operational efficiency

Improving maintenance costs

Enhancing equipment operating conditions

Extending lubricant life time

We purify the oils you use from particle contamination and increase their life time and efficiency.
